

"Thanks to "Super Pete" and the Team at Trilect

From Stuart J. Lobb CA BCom - Chartered Accountant & Landlord"

Back in 2005 we were starting our renovation project at "Lothbury" our heritage home in Remuera built in 1919.

We contacted a number of "sparkies" from the yellow pages to come and quote on the initial rewiring of the old circuit boards, other firms gave outrageous quotes or could not face the challenge of rewiring an old Kauri framed house with pressed plaster ceilings.

Right from the start the McInally Brothers and the team from Trilect were the only ones who made sense, they turned up when it mattered, consistently going the extra mile and showing calm professionalism, nothing was a problem. They provided so many services for the modern home including, entry gates, speaker systems, alarms and video entry phones, lighting, water fountains, spa pools, computer cabling & patch panelling, under-floor heating and the complete inside and out wiring modernisation. They helped make our complex 2-year renovation a success, and we could not recommend them highly enough.

Of the 50 contractors we employed in the course of our renovations they were the ones who stood out and continue to do so today.

You are welcome to contact me personally if you want further details at stulobb@mac.com

Yours sincerely

Verena, Charlotte, Jack & Stuart Lobb
